MANUFACTURER AND TRADER OF MILITARY WEAPONS AND AMMUNITIONS  
AC-Unity d.o.o. - Industrijska zona Vitkovići bb - 73000 Goražde, Bosnia and Herzegovina  
Phone/Fax +387-38/230-130 - Email info@ac-unity.com - Web www.ac-unity.com

## Application

The all new **AC-Flare Gun** is a modern state-of-the-art and highly durable tool to dispense 26,5mm flares or smoke grenades. The body of the pistol is made of a special polymer which is highly impact and UV resistant and can be operated through a wide range of temperatures. The barrel of this flare gun is made of stainless steel which guarantees a minimum lifetime of about 2'000 shoots with full power flares.

Flare guns are used in any situation when you need to send a distress signal. The flares must be shot straight up into the air, making the signal visible for a longer period of time and revealing the position of whoever is in need of assistance.

## Delivery Package

The AC-Flare Gun is shipped in the following standard configuration:

- Flare gun
- Polymer box with sponge
