ALFA AC-SMG9

SUBMACHINE GUN
CALIBER 9x19 mm

The **Alfa AC-SMG9 Submachine Gun** has been designed to especially fit law enforcement requirements, allowing easy handling through the compact conception. The small size and weight result in a smooth handling in vehicles and buildings while also granting long-range capabilities by using the extractable stock.

Blow Back System

The simple and reliable **blow back system** not only makes the cleaning and maintenance easier for the users in the field but also reduces the felt recoil, especially when fired in the full-automatic mode.

Upper Receiver

The **upper receiver** is made from 7075 aluminum alloy with a hard anodized surface, making it highly resistant and durable.

Barrel

Barrel length is available in two dimensions 7,5" and 10,5".

Buttstock

The **retractable polymer buttstock** provides various points to attach quick-detachable swivel slings and can be extended to 5 different lengths positions. In addition each buttstock comes with 3 different rubber back-plates, allowing easier handling in different positions and for different operation purposes.

Fire Selector

In order to provide maximum comfort and safety an ambidextrous **fire selector** has been designed with easily recognizable icons allowing to see and feel the modes even in low-light conditions.

Lower Receiver

The **lower receiver** is made of light-weight aluminum or high-resistance polymer, reducing the total weight of the gun and absorbing the recoil of the system. The magazine well accepts 9mm magazines of different capacities and provides finger grooves in the front. Any standard AR-15 grip can be chosen and mounted by the user.

Handguards

The **handguards** are provided in aluminum or highly resistance polymer and can be changed easily with a quick attachment mechanism. Following latest trends and reports a M-look system has been used to allow for individual mounting of any kind of additional rails in different positions and at the same time provide a more comfortable handling and lower total weight, even in the metal version of the handguard.

Application

The Alfa AC-SMG9 has been specially developed for the special forces of Bosnia, requesting a reliable product for professional users. The overall design is based on the idea to provide a one-fits-all solution for various users and purposes within different forces and the result is a multi-purpose weapon for modern urban requirements.

The Alfa AC-SMG9 is fully compatible with weapons of the M16 and M4 family, providing a simple and reliable blow-back system in the caliber in 9x19, allowing for easy cleaning and maintenance and reliable functioning. The Alfa AC-SMG9 is produced with highest technical standards, taking into consideration the real needs of modern police and military forces. Together with the used materials and surfaces technology guarantee simple maintenance and functionality and performance in all environments and conditions.

Delivery Package

The Alfa AC-SMG9 is shipped in the following standard configuration:

- Alfa AC-SMG9 Submachine Gun
- User Manual
- Flip Up Front and Rear Sights
- Two 30 Rounds Magazines
