AC UNITY

PRODUCT CATALOGUE

This catalogue provides an overview of AC Unity's capabilities and technical specifications. It is intended for business partners, distributors and authorized users to offer a quick and clear understanding of our products, their capabilities and our production standards.

The document contains basic technical data and descriptions and is not a substitute for mandatory documentation that accompanies the delivery of individual products.

AC Unity is committed to responsible and lawful conduct at every stage of its operations. The safety of our production processes and the safe use of our systems are priorities. Every product undergoes internal quality control and testing before shipment.

We urge customers and end-users to use products in accordance with applicable laws and regulations and to strictly observe all safety procedures. We do not support unauthorized, illegal or reckless handling of firearms.

Company Profile

AC Unity is a **fully licensed manufacturer of small-arms components and systems, based in Goražde, Bosnia and Herzegovina.** The company is located in an industrial hub surrounded by metalworking and defense-related industries, creating strong synergies and advantages in production. By combining modern technology with the region's long tradition of precision metal processing, AC Unity has built a foundation of reliability and innovation.

We supply high-precision spare parts, assemblies, and accessories to military, police, Original Equipment Manufacturers (OEM), and aftermarket customers worldwide. Our portfolio covers modular weapon platforms and hundreds of spare parts engineered for durability, interchangeability, and field performance. With every product, we ensure compliance, quality, and a commitment to supporting partners across more than 30 international markets.

125+
Products Developed

30+
Export Markets

10+
Years of Experience

- Fully licensed manufacturer and trader
- Upgrades of standard small-arms systems
- High-quality accessories and parts for AR, AK, and other platforms
- Production of high capacity magazines for different calibers from 9×19 to 7,62×51
- In-house research and development
- High-precision machining and testing

From concept to component.
AC Unity craftsmanship in
every detail.

Our Expertise

We bring the full spectrum of capabilities under one roof. From design and product development to advanced machining and injection molding, we control every stage of production. This integrated approach ensures precision, consistency, and innovation in every component we deliver to our partners worldwide.

Design & Product Development

Research, engineering design, and product development focused on innovative solutions and functional performance.

Toolmaking for Polymers & Metal-Plastic Combinations

Serial production of molds and tools for polymer components, non-ferrous metals, and advanced metal–plastic assemblies.

Precision Machining & Metalworking

High-volume manufacturing of aluminum and metal parts, supported by a wide range of machining processes.

Injection Molding & Assembly

Design, development, production, assembly, and distribution of injection-molded products for global markets.

Our Strength

Our strength lies in people. AC Unity brings together experienced **metalworkers, mechanical engineers, quality specialists, logistics professionals, and a dedicated management team.** Together, they ensure that every process – from design to delivery – reflects precision, responsibility, and long-term vision.

The culture at AC Unity emphasizes practical expertise, continuous learning, and collective accountability, creating a workplace where innovation and reliability go hand in hand.

Quality First

We lead by quality as the ultimate measure of our work.

Precision Matters

Attention to detail and tightly controlled tolerances are at the core of every product.

People Care

We invest in our employees' safety, growth, and well-being.

Innovation with Responsibility

Developing new products that push boundaries while respecting safety and ethical standards.

Customer Focus

Listening to the needs of our clients and delivering tailored, effective solutions.

Mission & Vision

At AC Unity, we are committed to delivering the **highest quality products and services** to our clients. We use the latest manufacturing techniques and technology to ensure that our products meet the highest standards of performance and reliability. With our experienced team of professionals and dedication to excellence, we are the go-to source for all your military weapons and ammunition needs.

OUR MISSION IS to design and produce reliable, high-precision small-arms components and systems that meet the needs of professional users - while upholding the highest standards of safety, legality and quality.

OUR VISION IS to become a recognized regional hub for small-arms engineering and responsible supply, known for innovation, service excellence and ethical conduct in all markets we serve.

ENGINEERING INTEGRITY
Measured performance, repeatable quality.

RESPONSIBILITY
Legal compliance and safe use advocacy.

CUSTOMER PARTNERSHIP
Flexible service and aftermarket cooperation.

CONTINUOUS IMPROVEMENT
R&D investment and staff development.

R&D Focus

Design at AC Unity starts with practical requirements and ends with field-validated components. We combine CAD-based engineering, rapid prototyping and iterative testing to bring robust solutions to market.

CAD/CAM DESIGN WORKFLOW

Advanced computer-aided design and manufacturing processes ensure precision from concept to final product.

MATERIALS EXPERTISE

High-grade steels, aluminums, and engineering polymers selected for strength, durability, and reliability.

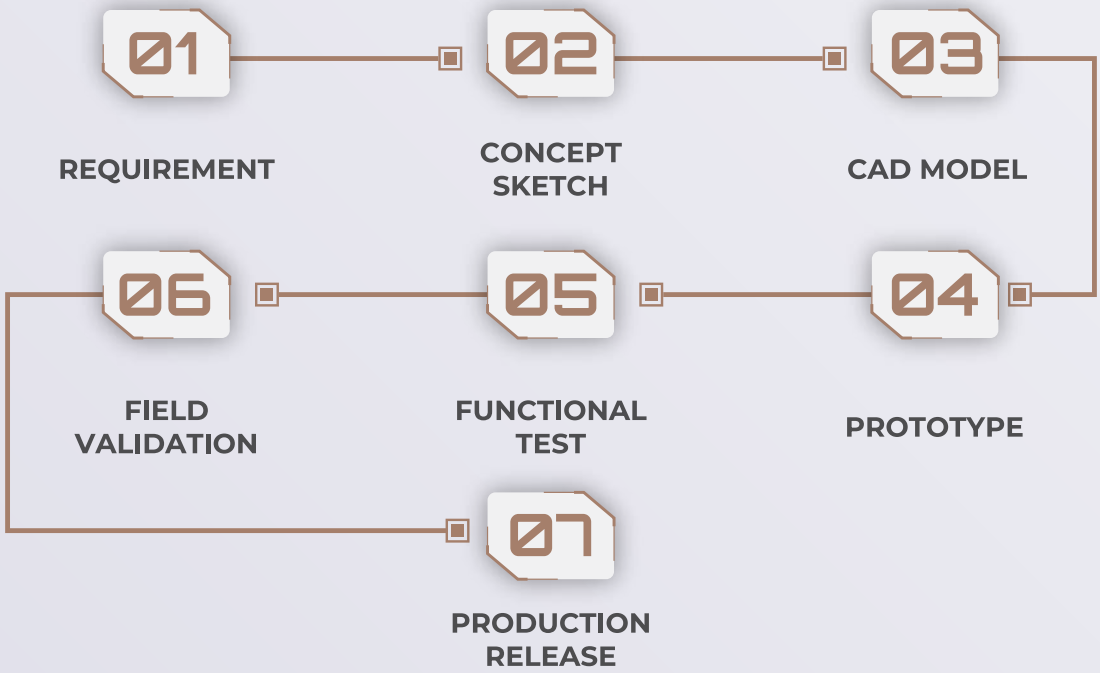

IN-HOUSE PROTOTYPING

Dedicated prototyping facilities allow rapid testing, refinement, and validation of new designs.

MODULAR DESIGN APPROACH

Engineering focused on compatibility across platforms, enabling flexible upgrades and interchangeability.

Why Details Matter

A small component can determine overall system reliability. In every product we make, precision is not optional — it is essential. We believe that the smallest details define performance in the field. Every curve, texture, and tolerance is engineered with purpose, ensuring reliability, safety, and consistency under demanding conditions. This is why we focus on the details: because in small arms and components, details are what matter most.

High-strength polymer/metal blend
engineered for durability and reduced weight

Reinforced stress points
extra strength where it matters most

Precision-fit tolerances
for dependable fit and performance

Corrosion-resistant coating
long-lasting protection against wear

Non-slip texture
reliable grip in all conditions

Lightweight construction
performance without unnecessary mass

Ergonomic design
optimized for handling and comfort

Field-tested reliability
proven performance in demanding environments

Weapons Portfolio

AC Unity produces and supports several complete platforms alongside a broad array of components. Below is a snapshot of our core weapon systems.

AR SERIES (AR-9 / AR-15 VARIANTS)

1. **Overview:** modular design, caliber options, compatibility notes.
2. **Key features:** CNC receivers, modular handguards, high-capacity magazines.
3. **Typical applications:** OEM supply, law-enforcement & authorized security.

PISTOLS

1. **Overview:** standard pistol family (service variants and spare parts).
2. **Key features:** hardened slides, precision barrels, aftermarket parts.
3. **Notes:** product configurations vary by market and export regulations.

FLARE / SIGNAL GUN

1. **Use:** signaling and non-lethal signaling devices for maritime / safety use.
2. **Design:** robust polymer/metalconstruction, dedicated barrels and chambers.
3. **Compliance:** intended for authorized civilian and professional use; follows local regulations.

Parts & Accessories

Our catalogue covers a wide range of parts for the most popular platforms. Below are the primary categories and a few highlight products.

BOXES & CASES

Sustainability, Ethics & Community

AC Unity recognizes the social responsibility beyond production that comes with manufacturing sensitive systems. We pursue practices that minimize environmental impact and support community resilience.

Material optimization to reduce scrap and waste.

Responsible disposal and recycling of metal and chemical byproducts.

Compliance with export controls and legal frameworks.

Community engagement: technical training programs, safety seminars and support for authorized local institutions.

Donation to & support of local community activities.

AC ALFA SMG 9

FEATURES

The AC-Unity Alfa AC-SMG9 is a modern 9×19 mm submachine gun designed and manufactured in Bosnia and Herzegovina, representing one of the most advanced firearm projects developed by AC-Unity. Engineered for the needs of military, law-enforcement, and special-purpose units, the AC Alfa SMG 9 combines compact dimensions, lightweight construction, and high modularity to deliver exceptional performance in close-quarters and urban environments. Built around a simple yet reliable blowback operating system, the platform ensures ease of maintenance and long-term durability while offering excellent controllability during rapid or automatic fire.

Featuring a forged aluminum upper receiver, ergonomic controls, and compatibility with widely used M16/M4-type components, the Alfa AC-SMG9 stands out as a versatile and user-friendly weapon system. Its adjustable stock, ambidextrous fire selector, and multiple barrel-length options allow operators to tailor the firearm to different tactical roles. With its robust design and practical features, the AC Alfa SMG 9 demonstrates the growing technological capabilities of the Bosnian defense industry and its readiness to meet modern security demands.

MADE IN
BOSNIA & HERZEGOVINA

DELIVERY PACKAGE

The AC Alfa SMG 9 is shipped in the following standard configuration:

- AC ALFA SMG 9 Submachine Gun
- User Manual
- Flip Up front and Rear Sights
- Two 30 Rounds Magazines
- Cleaning Kit
- Tactical Sling

Item Code:
AC00046

BUTTSTOCK

The telescopic polymer buttstock is designed to provide the perfect balance between comfort and practicality. With its adjustable length and durable construction, it allows shooters to customize their rifle according to different needs and operational scenarios. Ergonomically shaped and crafted from high-quality materials, this buttstock ensures excellent performance in various situations

BLOWBACK SYSTEM

The reliable and simple blowback system is designed to ensure high performance and easy maintenance. This system allows the rifle to function flawlessly even in the most challenging conditions, including full auto/cyclic mode.

FIRE SELECTOR

In order to provide maximum comfort and flexibility, the fire selector is ergonomically designed. It allows the shooter to easily choose between different firing modes, even in the most challenging conditions.

AC ALFA SMG 9

UPPER RECEIVER

The upper receiver is made from high-quality aluminum that is lightweight and durable. It has excellent corrosion resistance.

BARREL LENGTH

Barrel length available in 7.5” and 10.5”.

LOWER RECEIVER

The lower receiver is light, strong, and made from high-performance materials to guarantee maximum durability. It features an ergonomic design for better handling and operational effectiveness. The modular construction of the lower receiver provides easy customization, enabling additional parts and accessories to be attached and mounted by the user.

AC FLARE GUN

FEATURES

The all-new AC-Flare Gun is a next-generation, highly durable launching platform designed for reliable deployment of 26.5 mm flares and smoke signals. Engineered for demanding field conditions, its advanced polymer frame offers exceptional impact resistance, UV stability, and dependable performance across extreme temperatures.

A precision-machined stainless-steel barrel ensures long service life and consistent firing reliability, delivering a minimum endurance of 2,000 full-power launches. Rugged, lightweight, and built for professional use, the AC-Flare Gun sets a new standard for modern signaling equipment.

MADE IN
BOSNIA & HERZEGOVINA

DELIVERY PACKAGE

The AC Flare Gun is shipped in the following standard configuration:

- Flare Gun
- Polymer box with sponge
- 3 language manual in English, German and Bosnian

Item Code:
AC00048

SPECIFICATIONS

AK47 MAGAZINE

10 RDS Gen2

FEATURES

This high-quality AK47 Magazine is meticulously crafted to ensure reliable, smooth, and consistent operation in all conditions. Engineered for perfect compatibility with **AK47, AK103, AK104, AK15, AKM, AKS, and SIG556R** rifles, it offers exceptional versatility across multiple platforms.

Designed for demanding users, it delivers stable feeding, long-term durability, and dependable performance, making it an excellent choice for training, sporting use, and everyday field operations

AK47 MAGAZINE

30 RDS Gen2 with side window

FEATURES

The new **AC-Unity 30RDS Gen2 Window Magazine for AK47** is a strengthened and refined evolution of the original Gen1 model. Retaining the exceptional reliability of its predecessor, the Gen2 introduces a more streamlined, integrated baseplate and includes two follower options: a **Yugo-style Bolt Hold Open (BHO)** follower and a **non-BHO Soviet-style** follower.

Constructed from AC-Unity's exclusive advanced polymer-resin/granulate, this magazine is exceptionally lightweight, highly shock-resistant, and engineered to withstand impact across a wide range of temperatures. The robust polymer body requires no steel reinforcement, ensuring reduced weight without compromising durability.

AK47 MAGAZINE

30 RDS Gen3 no side window

FEATURES

The new **AC-Unity 30RDS Gen3 Magazine for AK47** is a strengthened and refined upgrade to the Gen2 window magazine it replaces. It delivers the same trusted functionality, now enhanced with a more streamlined, integrated baseplate and two follower options: a **Yugo-style Bolt Hold Open (BHO)** follower and a non-BHO Soviet-style follower.

Manufactured from AC-Unity's proprietary advanced polymer-resin/granulate, the Gen3 magazine is exceptionally lightweight, extremely shock-resistant, and durable across a broad temperature range. This exclusive polymer blend provides a significant advantage in weight reduction and long-term durability without requiring any steel reinforcement.

AK47 MAGAZINE

30 RDS Gen.4

FEATURES

The **30 RDS Gen4 AK47 Magazine** in 7.62×39 mm is engineered to deliver exceptional reliability and reduced weight for all AK47/AKM platforms. Developed primarily for **Ministry of Defence and Law Enforcement applications**, this magazine offers the durability and performance required for demanding operational environments.

Constructed from AC-Unity's advanced polymer resin/granulate, it is both lightweight and highly shock-resistant, ensuring dependable function across a wide range of conditions. The Gen4 design represents a further evolution in strength, resilience, and field-ready performance.

AK47 MAGAZINE

40 RDS Gen2 with side window

FEATURES

The **AC-Unity Gen2 40RDS Window Magazine** in 7.62×39 mm is engineered for lightweight, dependable performance across all **AK47/AKM platforms**. Designed to fit and function flawlessly in any 7.62×39 mm AK-pattern rifle, carbine, or pistol that accepts standard AK magazines, it delivers extended capacity without compromising reliability.

With its durable construction and proven feeding performance, the Gen2 40-round magazine is an excellent choice for users requiring increased ammunition capacity in both professional and sporting environments.

AK74 MAGAZINE

10 RDS

FEATURES

The **AC-Unity 10RDS Polymer Magazine** for AK74 rifles in 5.45×39 mm is engineered to be durable, lightweight, and exceptionally reliable. Built for consistent performance, it fits and functions flawlessly in all **standard AK74-pattern firearms**, including rifles, carbines, and pistols chambered in 5.45×39 mm.

Designed for users who require dependable feeding and rugged construction in a compact format, this 10-round magazine is ideal for training, hunting, and professional applications.

AK VZ58 MAGAZINE

30RDS with side window

FEATURES

The AC-Unity 30-round window magazine is designed for the Czech VZ58, VZ2008, and compatible clones using VZ58-pattern magazines. Built to surpas the strength and impact resistance of original VZ58 aluminium magazines, it delivers exceptional reliability in all conditions.

Constructed from AC-Unity's advanced polymer-resin/granulate, the magazine is extremely shock-resistant and lightweight, withstanding drops even on the feed lips without cracking. The body remains impact-resistant across a wide temperature range.

Steel-reinforced front and rear lugs provide added durability and secure lockup. The material composition ensures long-term storage capability, even when fully loaded, without deformation or spreading of the feed lips.

GLOCK M17 MAGAZINE

10 RDS with side window

FEATURES

The **AC-Unity M17 10RDS Window Magazine** in **9×19 mm** is manufactured from advanced, high-grade polymer to ensure maximum impact resistance, long-term durability, and dependable function. Built to withstand extreme temperature fluctuations from **-60 °C to +60 °C**, these magazines will not crack, deform, or fail even when dropped or run over by an SUV.

Thanks to its specialized material composition, the magazine maintains structural integrity during extended loaded storage. The feed lips remain stable and will not spread or deform under spring pressure, ensuring consistent performance throughout the magazine's lifetime.

GLOCK 43 MAGAZINE

6RDS

FEATURES

The AC-Unity 43 magazines 6RDS cal. 9x19mm are made from advanced high-grade polymer, guaranteeing from maximum impact resistance and durability. These magazines have a long lifetime and can survive maximum temperature fluctuations from -60°C to +60°C.

They will not break or crack when dropped or even when run over by an SUV. The material composition allows for long time storage, even when fully loaded, and the magazine lips will stay in the correct position and not spread or balloon because of spring pressure. The magazines fit any 9mm pistol as well as other weapon system operating with standard 9mm magazines. This magazine also serves as perfect alternative magazine for any user who prefers to have the possibility to see the remaining rounds from outside through the transparent window. The magazines can easily be disassembled and cleaned through the special base plate design.

AK Lower Handguard

FEATURES

The AC-Unity AK Lower Handguard is designed for stamped-receiver AK47, AKM, and AK74 rifles. It is manufactured from the same advanced, high-strength polymer used in AC-Unity magazines, lightweight, extremely impact-resistant, and stable across a wide range of temperatures.

Precision-machined metal reinforcements made from marine-grade aluminium alloy provide enhanced rigidity. This alloy is hardened, anti-magnetic, and highly corrosion-resistant, ensuring long-term durability in demanding conditions.

The bottom of the handguard includes a designated Picatinny rail mounting area, which will be available soon.

The product comes with an AC Picatinny rail included.

AK Upper Handguard

FEATURES

Upgrade your AK with the AC-Unity black upper handguard, built for standard Russian-pattern AK47, AKM, and AK74 gas tubes. Made from AC-Unity's advanced impact-resistant polymer, it offers exceptional durability, low weight, and reliable performance in a wide range of temperatures.

An optional Picatinny rail is available for adding optics, lights, or other accessories, giving your rifle even more versatility. Reinforced with marine-grade aluminum alloy, the handguard delivers outstanding rigidity, corrosion resistance, and long-term strength.

Test-fitted on Bulgarian and Polish AK47/AKM gas tubes, it installs securely and delivers a solid, comfortable feel with a clean, modern look.

The product comes with an AC Picatinny rail included.

Carbine Buffer Tube Assembly With 85G

FEATURES

The AC-Unity Carbine Buffer Kit is built for AR-15 platform rifles chambered in .223 Rem and 5.56x45mm, offering a dependable Mil-Spec solution for new builds, upgrades, or workshop projects. The buffer tube is precision-machined from 7075-T6 aluminum, providing exceptional strength and durability with true Mil-Spec dimensions and six adjustable positions. Paired with a steel carbine buffer spring and standard carbine buffer, this kit ensures consistent cycling and long-term reliability.

Proudly manufactured and assembled in Bosnia with strict quality control.

Includes:

- Mil-Spec 7075-T6 Aluminum Buffer Tube (6-position)
- Carbine Buffer
- Carbine Buffer Spring

Compatibility Notes:

- Designed only for AR-15 platform rifles in .223/5.56
- Not compatible with .308 / AR-10 platforms
- Components are engineered as a matched carbine-length assembly; parts cannot be mixed with rifle-length tubes, buffers, or springs unless the entire assembly is replaced

AC MIL-Spec Stock Assembly

FEATURES

The AC-Unity Mil-Spec Stock Assembly is an ideal upgrade for any AR15/M4 or for building a new carbine rifle. Originally developed for the AC-SMG carbine, this buttstock is rugged, lightweight, and extremely user-friendly. It delivers excellent shoulder stability, a solid, confidence-inspiring feel, and eliminates rattles and flex often found in stocks of similar weight.

The buffer tube is precision-machined from 6061-T6 aluminum and hard-coat anodized for long-term durability. The 6-position telescoping stock includes a built-in sling swivel, allowing easy attachment of your preferred rifle sling.

The AC Stock Assembly is ready to install straight from the package and is compatible with AR15, LR308, and AR9mm carbines (Mil-Spec diameter)—a fantastic Mil-Spec stock solution for 5.56, 7.62, and SMG platforms.

The package includes everything you need for install on your AR15 style receiver:

AC-Unity AR15 Mil-Spec buttstock
6-position buffer tube
castle nut
quick detach sling socket end plate
buffer
recoil spring.

AR Buttstock

FEATURES

The AC-Unity AR Mil-Spec Buttstock comes with three interchangeable rubber buttpads, allowing shooters to adjust length and shoulder comfort for optimal targeting quickly. The quick-detach buttpad system lets you swap pads within seconds.

Rugged, lightweight, and highly user-friendly, this buttstock offers exceptional build quality, smart ergonomics, and a solid, rattle-free feel, providing superior stability compared to most stocks in its weight class.

Originally developed for the AC-SMG carbine, it is fully compatible with all AR-platform carbines in 5.56, 7.62, and 9mm SMG configurations. Constructed from AC-Unity's advanced polymer-resin blend, it delivers outstanding impact resistance across a wide temperature range and comes with a lifetime warranty against defects.

AR Flash Hider

FEATURES

The AC-Unity Standard Flash Hider (AAR-9) is a durable, lightweight option for AR-pattern carbines and rifles. Threaded at 1/2×28, it's constructed from a steel-forged aluminum blend with a hard-coat anodized finish for long-term durability and corrosion resistance. Installation takes only seconds.

Designed to maintain the classic AR15 profile while helping reduce muzzle rise, this flash hider is an excellent upgrade for shooters who want reliable performance without changing the rifle's original appearance.

AR Dust Cover

FEATURES

The AC-Unity AR15/M4 Ejection Port Cover Assembly was initially engineered for the AC-SMG carbine and is built from the same advanced, high-strength polymer used in all AC-Unity magazines. Unlike traditional stamped-steel dust covers, this lightweight polymer design will never rust and offers exceptional durability in all climate conditions.

The reinforced polymer construction delivers outstanding impact resistance across a wide temperature range, ensuring long-term reliability whether you're running a hard-use carbine or building out a custom rifle.

Installation couldn't be easier; snap it into place in seconds. Removal and re-installation are just as quick, making this an ideal upgrade for shooters who want a no-fuss, cost-effective solution that lasts.

SMG Handguard

FEATURES

The AC-Unity SMG9/AR15 Free-Floating Handguard is a modern, ultra-light M-LOK handguard system engineered from advanced polymer for exceptional durability. Designed to remain extremely impact-resistant across a wide range of temperatures, this handguard offers a rugged, dependable solution for both duty rifles and performance-oriented builds.

In line with current industry standards, the M-LOK interface allows shooters to mount accessories exactly where they need them: lights, grips, lasers, and rail sections, while maintaining a slim, comfortable profile for superior handling and control.

The handguard mounts to a **BCM barrel nut** or any compatible barrel nut designed to fit the **1.379" rear opening**. An intelligent self-indexing design provides secure, repeatable alignment. Three bottom-mounted clamping screws lock the handguard firmly to the barrel nut for a solid, free-float installation.

AR Bolt Assemble

FEATURES

The AC-Unity AR 9mm Bolt Assembly is engineered for maximum reliability and is compatible with a wide range of 9mm AR-pattern upper receivers. Designed as a heavy-duty, single-piece bolt for straight blowback systems, it delivers dependable performance and consistent cycling across various 9mm magazine types, one of its key advantages.

Because AR-9 platforms use an external ejector located in the lower receiver, this bolt does not incorporate an internal ejector, ensuring proper function with standard AR-9 lower designs.

Includes:

Bolt body - hardened steel with hard-coat anodized finish

Extractor - hard-coat anodized finish for long service life

Firing pin - silver-coated for smooth operation

Firing pin spring - carbon-wire construction

Bolt pin and parallel pin

AC M16 Trigger

FEATURES

Manufactured to true Mil-Spec dimensions, the AC-Unity M16 Trigger is a high-quality, factory-grade replacement component for registered full-auto M16-pattern rifles and other legally owned full-auto platforms that accept an M16-style open-back trigger. Built from durable, hardened steel, this trigger features precision-ground engagement surfaces to ensure smooth, consistent, and reliable operation.

Key Features:

Full-auto M16-type open-back trigger (for use in legally registered full-auto receivers)

Hardened steel construction for long service life

Blued finish with surface-ground engagement points

Fits Mil-Spec full-auto AR-15/M16 lower receivers

Engineered for excellent fit, feel, and performance, the AC-Unity Full-Auto M16 Trigger provides dependable function in demanding professional, duty, or training environments where legally authorized.

AR Disconnector

FEATURES

The AC-Unity AR Disconnector is precision-machined from durable steel and finished in a sleek, corrosion-resistant black coating. Designed to fit most AR-10 and AR-15 platforms, this component installs in the lower receiver alongside the trigger. When engaged, the disconnector reliably releases the hammer as part of the firing cycle, ensuring smooth and consistent operation.

As a factory-original AC-Unity part, this disconnector is an excellent choice for replacing a worn or damaged component, or for keeping on hand as a critical spare. AC-Unity is globally recognized for producing high-quality firearms and components, so when you choose an AC-Unity part, you're getting proven materials, precision manufacturing, and dependable performance you can trust.

AR Disconnector Full Auto

FEATURES

The AC-Unity AR Disconnector is one of the key full-auto fire-control components in the M16 platform. Working in tandem with the M16 Auto Sear Assembly, it plays a critical role in maintaining safe, consistent, and reliable full-auto operation.

Precision-machined from durable steel and finished in a protective black coating, this disconnector is built for long service life. In addition to full-auto M16 applications, it is also compatible with most AR-10 and AR-15 platforms. Installed in the lower receiver next to the trigger, the disconnector releases the hammer during the firing cycle when the trigger is activated.

Full-auto disconnectors are known to require periodic replacement, but with the AC-Unity M16 Disconnector, you get a robust, high-quality component designed to keep your registered full-auto rifle running smoothly. It is an excellent choice for maintaining or restoring proper function in legally registered M16 rifles.

AR Bolt Catch

FEATURES

The AC-Unity AR Steel Bolt Catch is engineered for fast, intuitive weapon manipulation. Its enlarged lower paddle makes locking the bolt to the rear effortless, while the oversized upper portion enables quicker, more positive bolt releases perfect for speed reloads or glove-hand operation. The enhanced geometry provides a clear tactile reference point when sending the bolt forward and chambering the next round.

Fully machined from premium S7 tool steel, this bolt catch is heat-treated to Rc 47-51 and double-tempered for exceptional durability and impact resistance. Finished in a clean matte black, it's an ideal upgrade for any AR build or a dependable replacement for worn components.

Designed to fit all forged and most billet AR receivers, this upgraded bolt catch delivers rugged performance, improved ergonomics, and long-term reliability guaranteed not to break under hard use.

AR Anti-Walk Pins

FEATURES

AC-Unity Anti-Walk Pin Sets are the perfect upgrade for any AR-15 compatible with both drop-in trigger units and traditional mil-spec fire control groups. Designed to keep your trigger assembly firmly secured under hard use, these pins prevent unwanted movement and eliminate the common issues caused by loose or drifting trigger and hammer pins.

Engineered to complement AC-Unity's newly re-tooled trigger group production, these anti-walk pins reflect the same commitment to precision, enhanced durability, and increased manufacturing capacity. With upgraded tooling and advanced production methods, AC-Unity ensures consistent quality and reliable supply for shooters who demand the highest standards in performance.

Includes:

- 2 steel anti-walk pins
- 4 retention screws
- 2 installation wrenches
- Easy-to-use assembly hardware

Features:

- Positive retention of the trigger assembly
- Fast, simple installation and removal
- Improved long-term reliability of your fire control group
- No sharp edges or protrusions—glove-friendly design

G3 Handguard

FEATURES

The AC-Unity Handguard is engineered to fit all HK33 carbines and clones, offering a modern upgrade with excellent durability and ergonomics. Manufactured in Bosnia by AC-Unity, this handguard is made from an advanced polymer resin/granulate that is lightweight, shock-resistant, and UV-stable, built to handle hard use in any environment.

It also fits G3K and PTR91 rifles equipped with longer HK93-pattern handguards and cocking tubes, giving shooters a versatile, drop-in solution across multiple platforms.

The core structure features a one-piece 6061 aluminum design with steel mounting hardware, finished in a high-quality black hard anodizing for long-term durability and a clean, professional appearance.

A combination of superior ergonomics, rugged construction, and simple installation makes this one of the best HK-pattern handguards available on the market today.

HK MP5 Wide Handguard

FEATURES

The AC-Unity Wide Handguard is a perfect fit for your HK MP5, SP5, HK94, or any MP5-pattern clone that accepts standard MP5 handguards. Manufactured in Bosnia by AC-Unity using an advanced polymer-resin composite, this handguard is lightweight, shock-resistant, and UV stable. The material is engineered to withstand extreme temperatures from -30°C to 120°C, ensuring reliable performance in any environment.

Designed with a broader profile for improved control, it maintains the classic straight-wedge look of the original MP5 while offering a more substantial and comfortable grip. The vented layout enhances both cooling and aesthetics, and the molded texture provides a secure hold during fast or sustained shooting.

The product comes with an AC Picatinny rail included.

Ammunition Box AMB 02-02

FEATURES

This AC-Unity Ammo Box is engineered specifically for 200-round Minimi magazines and general ammunition storage. Designed for military and professional use, it delivers an unmatched combination of lightweight construction and exceptional strength.

Manufactured from AC-Unity's premium advanced polymer, this box is incredibly rigid yet impressively light. The intelligent structural design maximizes durability while minimizing weight, giving you a storage solution that is easy to carry but tough enough for field abuse. Whether used for ammo transport, range operations, or long-term equipment storage, this is one of the strongest polymer cans you'll find anywhere.
